10	Verify that if was entered an invalid sign up details, the details will be saved at database.	Negative
11	Verify that when entering characters in the password field, the characters are hidden.	Positive
12	Verify that after a successful registration, the details of the registration will be saved in less than 1 sec.	Positive
13	Verify that the email field displayed.	Positive
14	Verify that the password field displayed	Positive

Non-functional requirements:

Req 25. The system will be secured using the SSL protocol (Quality: Integrity).

Epic: Work environment capabilities.

User Stories:

- 110. As a simple user I would like that the site will be secure (using SSL protocol), in order to use the site safely.
- 111. As a doctor I would like that the site will be secure (using SSL protocol), in order to use the site safely.
- 112. As a system I would like that the site will be secure (using SSL protocol), in order to be safety from hacking or etc.
- 113. As a developer I would like that the site will be secure (using SSL protocol), in order to provide maximum security for users' details.
- 114. As an admin I would like that the site will be secure (using SSL protocol), in order to no one will have access to permissions.

Test cases:

No.	Test case	Negative/Positive
1	Make sure that the connection of the site is secure, approved and secured by the SSL protocol.	Positive

Req 26. Adjusting the system for both the computer and the mobile device (Quality: Flexibility).

Epic: Work environment capabilities.

User Stories:

- 115. As a simple user I would like that the site will be optimize, in order to enjoy the site on any device I own.
- 116. As a doctor I would like that the site will be optimize, in order to enjoy the site on any device I own.
- 117. As a system I would like that the site will be optimize, in order to a wide range of users will be able to use the site's services.
- 118. As a developer I would like that the site will be optimize, in order to meet the customer's desire to connect in the way he chooses to the site.

Test cases:

No.	Test case	Negative/Positive
1	Verify that the navbar adjusted in web mode and mobile mode – home page.	Positive
2	Verify that the navbar adjusted in web mode and mobile mode – login page.	Positive
3	Verify that the navbar adjusted in web mode and mobile mode – signup page.	Positive
4	Verify that the footer adjusted in web mode and mobile mode – home page.	Positive
5	Verify that the footer adjusted in web mode and mobile mode – login page.	Positive
6	Verify that the footer adjusted in web mode and mobile mode – signup page.	Positive
7	Verify that the home page adjusted in web mode and mobile mode.	Positive
8	Verify that the login page adjusted in web mode and mobile mode.	Positive
9	Verify that the signup page adjusted in web mode and mobile mode.	Positive

- More tests will be added according to the pages that will be created later ...

Req 27. The system will support any of the popular browsers (Chrome, Safari, Firefox etc.) (Quality: Flexibility).

Epic: Work environment capabilities.

User Stories:

- 119. As a system I would like to support on the most popular browsers, in order to that the site will appeal to a wide audience of users.
- 120. As a developer I would like to tailor the site to a variety of browsers, in order to that the system will interface best with all the sites.
- 121. As a simple user I would like that the site will run on any browser, in order to use the website on my favorite browser.
- 122. As a doctor I would like that the site will run on any browser, in order to use the website on my favorite browser.
- 123. As a simple user I would like that the site will run on any browser, in order to use the website that fits my computer.

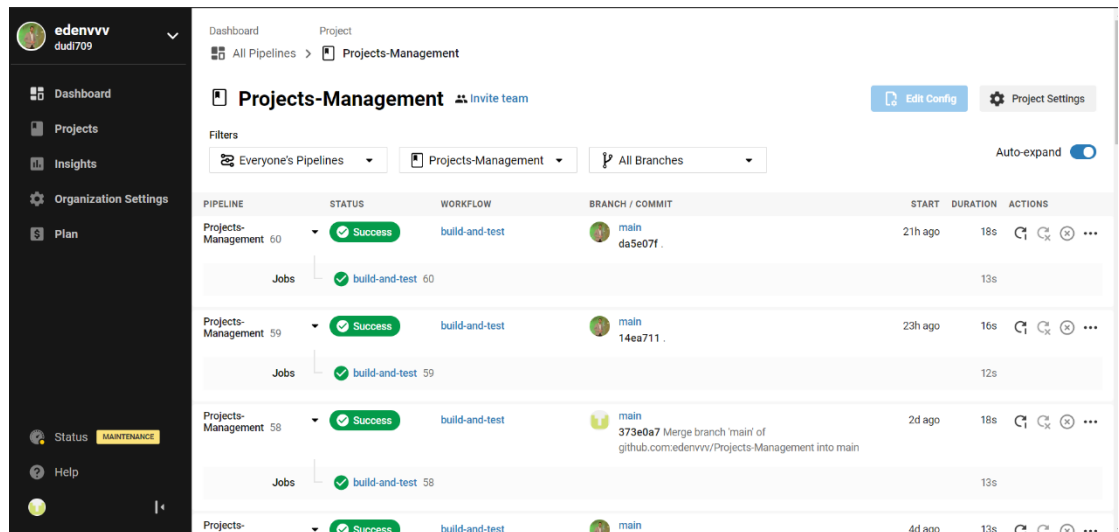

Test cases:

No.	Test case	Negative/Positive
1	Verify that the site supports Chrome browser version 89 and up.	Positive
2	Verify that the site supports Safari browser version 10 and up.	Positive
3	Verify that the site supports Firefox browser version 83 and up.	Positive
4	Verify that the site supports Edge browser version 89 and up.	Positive

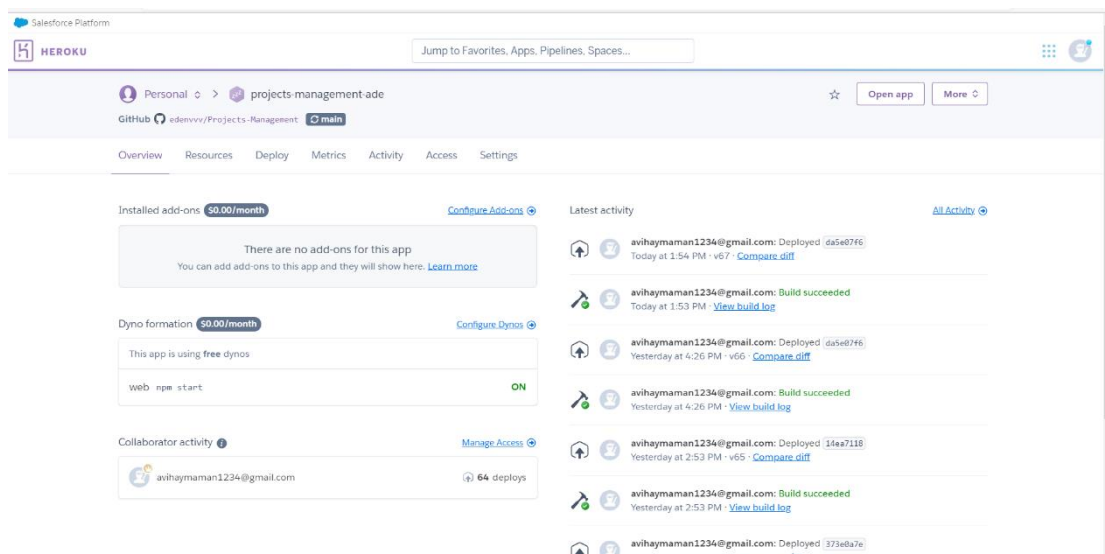

Explanation of Part 2:

In this project we decided to use the following tools:

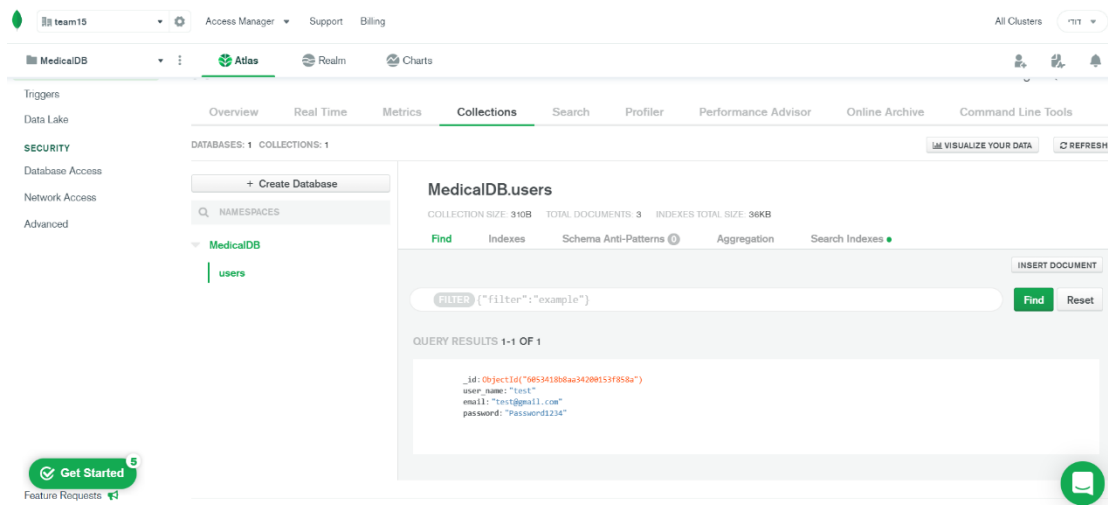

- For CI / CD we use the CircleCi tool

- For the CLOUD service for storing and running the project, we chose Heroku (<https://projects-management-ade.herokuapp.com/>)

- For saving the data we chose mongoDB

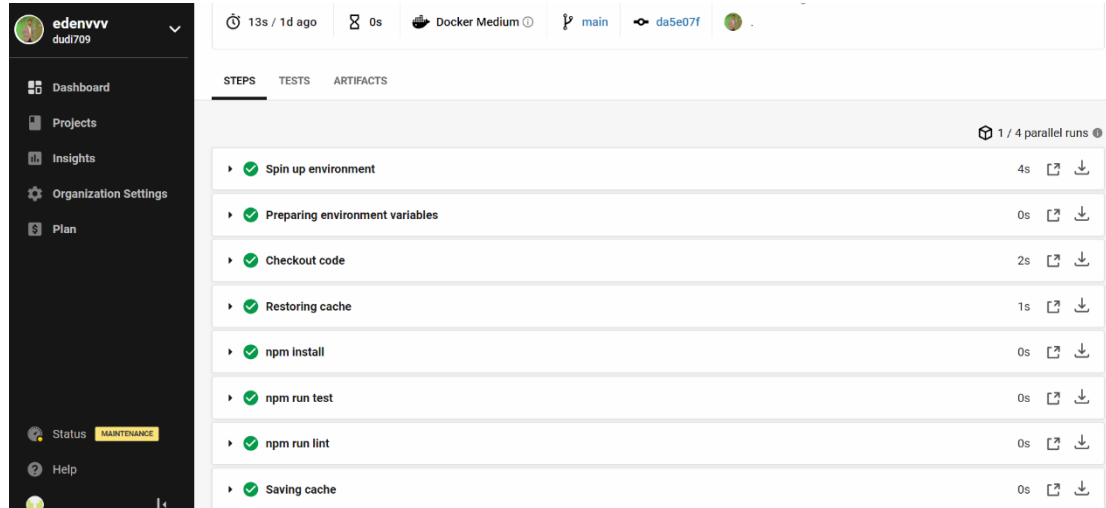

- The conventions we chose to use are single quotes, no semicolons.

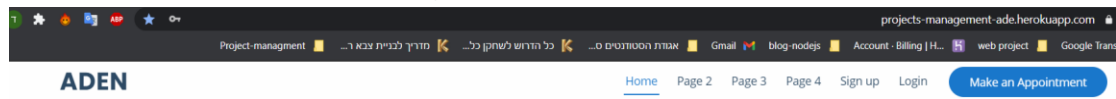

```
16     "rules": {  
17         "quotes": [  
18             "error",  
19             "single"  
20         ],  
21         "semi": [  
22             "error",  
23             "never"  
24         ]  
25     }
```

The software process in this sprint:

During the sprint running process, we used CI / CD tools when CircleCi was used to run the tests and dependencies and in addition to checking the conventions we agreed on.

The part of the CD was managed by Heroku.

All requirements were entered in the form of a user story in the clubhouse, each requirement was divided according to a suitable EPIC and in addition received a label for whom the requirement is intended (user, admin, system).

Later in the sprints and at our discretion we will add additional requirements.

We will distribute the requirements among all team members (everything will be managed through the clubhouse).

Part 3:

Division of requirements for sprints

We have divided the requirements into packages of several requirements which are framed from 1 to 27.

Sprint 3 – 60%	Sprint 4 – 40%
Requirements No. 1	Requirements No. 11
Requirements No. 2	Requirements No. 12
Requirements No. 3	Requirements No. 13
Requirements No. 4	Requirements No. 14
Requirements No. 5	Requirements No. 15
Requirements No. 6	Requirements No. 16
Requirements No. 7	Requirements No. 17
Requirements No. 8	Requirements No. 18
Requirements No. 9	Requirements No. 19
Requirements No. 10	Requirements No. 20
Requirements No. 21	
Requirements No. 22	
Requirements No. 23	
Requirements No. 24	
Requirements No. 25	
Requirements No. 26	
Requirements No. 27
